

# JUHO KARENKO

WEB DEVELOPER

2018

juho.karenko@gmail.com

(+358) 50 535 1469

## Profile

I am a software developer and have been into DevOps since before knowing it was a thing. Some of the more important aspects for me are striving for automation, collaboration, sharing and learning. Teaching and helping others I find to be extremely stimulating for me.

## Skills

### Software development

Web application and RESTful API development. Preference for agile methodologies, test driven development and using the right tool for the job.

### Infrastructure

Distributed systems, monitoring, always be automating.

### People

I don't necessarily consider caring for one's colleagues a skill, but I feel it is vital.

## Technical

Java

C#

Javascript

React

Ruby on Rails

Groovy / Grails

Linux

OS X

Ansible

Git

Relational databases

Apache HTTP Server

## Experience

### Solita

Software Designer

2016-

Back end Java development of a public-sector funding application handling system, application server infrastructure automation.

Sizable scale, long-standing customership. Close co-operation with client during all phases. Multiple simultaneous projects and a large team.

### FNX Solutions

Software Developer

2014-2016

Software development, recruiting, employee training.

Completed, worked on and deployed several software projects including an auction site (Grails/Javascript), a debt collection system (.Net) and a log data mining and metrics service package.

### Alma Media

Software Developer

2012-2014

Java backend development of Telkku.com, Finland's biggest TV guide site at the time.

Development of Content Router for internal use to help distributing the very large amount of images and articles a media company utilizes in its various services.

Automatic image cropping software for promotional images of TV programs for Telkku.com. Uses image entropy for finding the interesting part of an image (my early prototype version is available on GitHub).

### Ixonos

Software Developer

2012

Digital direct marketing software Java backend development, infrastructure and monitoring.

### Fonecta

Software developer

2010 -

Digital direct marketing software Java backend development, infrastructure and monitoring

2012

## Education

University of Helsinki  
BSc, Computer science, not done

2012-20XX

Vaskivuori high school  
Matriculation examination

1999-2002

---

## Languages

Finnish, native

English, fluent

German, basics

Swedish, basics
